HHS AWARDS \$450,812 TO EMORY UNIVERSITY TO SUPPORT LOCAL RESEARCH TO PREVENT ILLNESS AND IMPROVE HEALTH

HHS Secretary Tommy G. Thompson today announced that Emory University will receive \$450,812 to fund community-based research into local disease prevention and health promotion needs. The grant will support Care Delivery and Health Outcomes in a Medicaid, Community-Based Program, which will focus on developing the necessary infrastructure to provide community-based, non-institutionalized long-term care.

“This grant will help identify critical health research needs in Atlanta so that we can better target community efforts to promote good health and prevent illness,” Secretary Thompson said. “By supporting such local projects across the country, we are helping to develop and implement effective local strategies to improve the health of residents.”

The grant is one of 25 similar HHS awards across the country to support research in a variety of areas such as physical activity, diabetes, youth and school-based health, nutrition, obesity, asthma, drug prevention, tobacco prevention and violence/injury prevention. Findings from these research projects should assist communities develop public health policies and practices designed to promote health and reduce disease, disability and injury among specific populations.

The awards are being made under the extramural prevention research program at HHS’ Centers for Disease Control and Prevention (CDC). Grantees were chosen from more than 300 applicants.

“Community-based, peer-reviewed research is the foundation of the public health system. This program signals CDC’s commitment to strengthen infrastructure and community public health capacity through peer-reviewed research that has immediate relevance to the needs of public health practitioners, community policymakers and concerned citizens,” said Dr. Julie Gerberding, CDC director.
